Brow Aftercare

MICROBLADING

Follow these instructions after the original procedure and every touch-up.

FIRST TWO DAYS	Thirty minutes after leaving your appointment, clean your brows with a cotton ball and sterilized or bottled water. Apply a thin layer of the ointment provided. Repeat every 2 hours while awake for the first two days.
STARTING DAY THREE	Apply the provided ointment 3 times a day for 7-10 days.
USE A SMALL AMOUNT	Use only a small amount each time. You should have at least a quarter of the ointment left by day 7.
KEEP YOUR EYEBROWS DRY	Apart from the directed cleaning routine, do not get your eyebrows wet for the first 5-7 days.
DO NOT PICK	Let shedding skin, scabbing, or flaking come away naturally. Do not pick.
SWEATING & EXERCISE	Avoid sweating of any kind, yoga, swimming, and gym or exercise for at least 5 days. Follow the longer dry-healing period where specified for your treatment.
SUN & SKINCARE	Do not use retinol on the treated area for 30 days before and 30 days after treatment. Avoid direct sunlight for 2 weeks. Do not tan or use anti-aging creams, Retin-A, or alpha hydroxy products on the treated area for 30 days after the procedure.
TOUCH-UP APPOINTMENT	Return from 6 weeks to before 3 months after your initial procedure. Treatment is not complete until a minimum of two sessions has been completed. The same aftercare applies to touch-ups. A yearly touch-up is recommended to maintain color; additional appointments are charged separately.

Brow Aftercare

What to Expect

An approximate healing timeline. Everyone heals differently.

DAY 1

Freshly shaped brows. Color may look defined.

DAYS 2-4

Brows may look darker and more pronounced.

DAYS 5-7

Dryness and flaking may begin.

DAYS 8-10

Flaking may continue. Brows may look patchy.

DAYS 11-14

The ghosting stage. Color may look very light.

DAYS 15-21

Color may begin to return and soften as healing continues.
